Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Landvater.

Landvater shows, figure 22, a method and system for determining time-phased product sales forecasts and projected replenishment shipments for retail store supply chain. Column 21, lines 15-34, describes the part of the system, which is of most interest. Primary user display 502 is designed to permit the analyst to obtain additional information quickly and easily. Icons 506 on tool bar 508 provide a number of different graphs and spreadsheet displays, as does "drop-down" menu 510. The example in FIG. 22 shows a weekly forecast graph 512, a weekly replenishment graph 514, and a

Art Unit: 3627

weekly replenishment spreadsheet 516. The weekly forecast graph shows sales from 1416 prior years, as well as the forecast. The analyst can zoom in on the graph 512 to display more detail where necessary. The weekly replenishment graph 514 shows the projected inventory level illustrating the "sawtooth" curve showing the impact on inventory where shipments are projected to be received increasing the inventory and where sales gradually reduce the inventory level to near the safety stock level. The weekly replenishment spreadsheet 516 shows the same information in a spreadsheet format. Rows on the spreadsheet show the forecast, any quantities in-transit to retail store 23 from supplier, projected replenishment shipments, the safety stock level, and the projected on-hand balance. By going below the safety level at a given time, the graph is a visual warning.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Natarajan and Yablonski et al. show systems of interest.
